CRYPTO TAX

CryptoTax
CALCULATOR

Why use CryptoTaxCalculator?

It's built in Australia, by Aussies, for Australian accountants.

Our tools provide an all-in-one solution for both accountants and bookkeepers, covering hundreds of exchanges, blockchains and wallets, as well as complex processes like DeFi, DEXs, derivatives and staking. Improve your workflow and accuracy by using our crypto tax software.

Improve your workflow and accuracy with our crypto tax software.

Features

Manage all your clients in one portal

- Invite and manage clients all from one easy-to-use dashboard.
- Navigate through each client's data seamlessly to gain an understanding of their crypto activity.

SMSF Tax reports & valuations

- CryptoTaxCalculator offers trustees with crypto in their Self-Managed Super Fund (SMSF) an unparalleled way to track and report their capital gains/losses and taxable income, securing compliance with the ATO record-keeping requirements.
- The CryptoTaxCalculator Inventory report will provide a reliable valuation record of cryptocurrencies in AUD to aid with valuations required for the year-end SMSF audit.

Client reconciliation made easy

- Gain the ability to assess and reconcile your client's crypto transactions easily.
- Using the reconciliation view, see which of your client's transactions are considered high, medium and low impact, so you know where to start.

Support for 600+ integrations

- CryptoTaxCalculator supports 600+ integrations from a wide range of exchanges, wallets and chains.
- Using our integrations, you will be able to gain a complete view of your client's transaction history, with all the required data needed at your fingertips.
Designed for local tax rules.

- CryptoTaxCalculator is compliant with over 30 tax jurisdictions around the world.
- Built in collaboration with tax professionals from each region, so that any reports produced are aligned with their region's tax rules, inventory methods, and local currency.
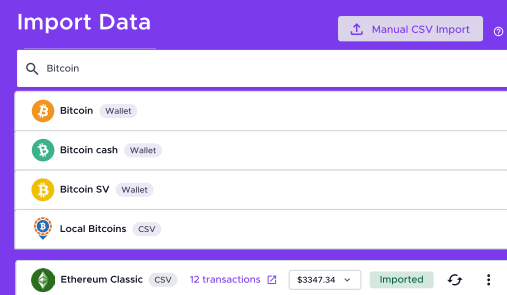

Getting started

Want to put your client's crypto tax report together, as accurately and painlessly as possible? If you answered yes, then CryptoTaxCalculator is the solution for you and your team!

So how exactly do you use **CryptoTaxCalculator** as an accounting tool?

1 **Invite** your first client
